

EIASM Webinar Serie Season #1

Dear EIASM Academic Council members,

We are particularly pleased to announce the very upcoming launch of the first season of our **EIASM webinar series**.

Since its foundation in 1971, the European Institute for Advanced Studies in Management has dedicated itself to raising the profile of European Management Research with respect to other established scientific disciplines, as well as the business world. We are European in origin, whilst being global in our outlook!

On the occasion of its 50th anniversary, the institute reaffirms its mission to **foster and support innovative, rigorous, responsible and impactful research** in management, governance and related disciplines. In this perspective, the EIASM Board wanted the institute to be able to provide the communities of the members of its Academic Council with a series of discussions on subjects that are both interdisciplinary and suitable for Grand Challenges we are currently facing in doctoral education and research in Management.
